- 209 Jack Norris veröffentlicht als Kommentar unter seinem Artel zu der Thematik von B12 und Lungenkrebs ein Zitat aus der Korrespondenz mit einem der Autoren der aufsehenerregenden Studie, welcher den Sachverhalt relativiert: »Please note that the increased risk that we observed was more or less restricted to male current smokers. Thus, there is little cause for concern among men but rather men who smoke and who are taking high doses of B6/B12 (and that this risk is several times that of men who smoke who do not take high doses of B6/B12).« Zugriff am 1.
